## **DETAILED ACTION**

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 10 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A computer program is merely a set of instructions capable of being implemented by a computer. However, by itself without being encoded onto a computer-readable medium is not realizable. Hence, claim 10 contains merely nonstatutory functional descriptive material. See MPEP 2106: IV(B)(1)(a), last paragraph.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Junsaku et al. JP 2002-216361.

Regarding claim 6, Junsaku et al. teach an information recording apparatus comprising: a writing device capable of writing record information onto an information recording medium comprising first and second recording layers (3 and 2 of Drawing 3, [0036]), a first controlling device for controlling said writing device to continuously write

Art Unit: 2627

the record information into the first and second recording layers (3 and 2 of Drawing 3, [0034] – [0037], [0048]), a second controlling device for controlling said writing device to write a predetermined amount of buffer data on an outer circumferential side of the record information written in the first and second recording layers ([0046] - [0048] the non-record section can be recorded) and a third controlling device for controlling said writing device to add buffer data on an outer circumferential side of the predetermined amount of buffer data (8a-8d of Drawing 3, [0046]). In regards to the first, second and third controlling device as claimed by the applicant, the examiner interprets the teachings of Junsaku et al. to teach these as one controller ([0028] – [0029]).

Regarding claim 7, Junsaku et al. teach the information recording apparatus according to claim 6, wherein said second controlling device responds to a first border close instruction after the record information is recorded over the first and second recording layers (8a-8d Drawing 3a-3b, [0046] – [0048]).

Regarding claim 8, Junsaku et al. teach the information recording apparatus according to claim 7, wherein said third controlling device responds to a finalize instruction ([0078] – [0083]).

Regarding claim 9, the limitations have been analyzed and rejected with respect to the reasons given above in claim 6. Further, one of ordinary skill in the art would have recognized the need for a method to operate the apparatus as claimed in claim 6.

Regarding claim 10, the limitations have been analyzed and rejected with respect to the reasons given above in claims 6 and 9.

Application/Control Number: 10/590,738 Page 4

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kezhen Shen whose telephone number is (571) 270-1815. The examiner can normally be reached on Monday-Friday 10am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Feild can be reached on (571) 272-4090. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
